

Question 1 - 0417/May/June/24/11 Q12

(a)	Three from: A type of credit card theft A digital copy of the credit card is made with data placed on a new blank card An unauthorised copy is made of the data Uses a concealed electronic scanner	3
(b)	Two from: Use of personal identification number/PIN Use of chipped cards Inspect the credit card reader you are using Use an RFID protector Sign up for text alerts on the account Not using your credit card if you feel unsafe/suspicious websites Don't let your card leave your sight Use third party/smartphone electronic payment systems	2

Question 2 - 0417/May/June/24/12 Q2

(a)	Injuries from trip hazard	1
(b)	RSI/Repetitive Strain Injury	1
(c)	One from: <u>Eye</u> strain Headache	1
(d)	Electrocution	1

Question 3 - 0417/May/June/24/12 Q15

	Four from: It provides guidance/best practice rules for organisations to follow on how to use personal data Regulates the processing of personal data Protects the rights of the data subject Helps to prevent personal data being misused by third parties Protects personal data	4
--	--	---

Question 4 - 0417/May/June/24/11 Q2

(a)	Encryption	1
(b)	Control	1
(c)	Hacking	1
(d)	(An) interview	1

Question 5 - 0417/May/June/24/11 Q7

(a)	Two from: Data can be stored on the laptop Does not require the use of external storage devices when transferring data to and from the office Employee does not have to use his own equipment saves the employee money Would only be used by the employee therefore improves security	2
(b)	Two from: Laptop can be lost/stolen in transit Laptop can be more easily damaged Risk of uploading/downloading a virus/malware by use of own devices Security could be compromised if own storage devices are used Device could be used for other work/personal activities (causing security problems)	2

(c)	Four from: Navigation buttons to move to next page Help button to get help with filling in the form Drop down lists to enter the address/name Auto-complete to speed up the process to add addresses Character boxes to make it easier to type in the data Good use of white space to make it easier to read Layout of form to make it easier to read Easy to understand instructions to help fill out the form correctly Use of radio buttons/tick boxes for gender Font size to make it easier to read Font style so it is easier to read Well designed layout to make it easier to fill in	4
(d)	Four from: Regularly rest the eyes Sit at arm's length from the screen Use a foot rest Use a wrist rest Arrange the workspace so that there is enough space to work Use an ergonomic chair/mouse/keyboard Maintain correct posture Use blue light glasses Ensure the room lighting matches the screen brightness Keep the laptop screen clear of dust and dirt	4

Question 6 - 0417/May/June/24/11 Q3

(a)	Password: 6lRrg08& Two from: No obvious sequence of numbers/letters Long password Strong password Hard to guess Not directly related to personal details	3
(b)	One from: Changing password regularly Use of anti-spyware/anti-malware Be aware of shoulder surfing	1

Question 7 - 0417/May/June/24/13 Q7

(a)	Two from: Must contact the copyright holders She must ask permission to use the material She should acknowledge whether material was copyright free or not She should acknowledge the sources for the material	2
(b)	Three from: Users must not lend/rent/sell the software to other people User must not install the software on a network when other users can access it unless it is a network version Users must not modify/plagiarise the software Must not use coding from the software in your own software	3
(c)	Three from: Prevents theft of intellectual material Protects the copyright of the owner of the software Prevents plagiarism To ensure people are rewarded for their endeavours	3

Question 8 - 0417/May/June/24/13 Q12

(a)	Two from: Keylogging is a software/hardware device It records/sends to a third party every keystroke on your keyboard It can gain fraudulent access to passwords/confidential information.	2
(b)	Two from: Install anti-keylogging/anti-malware/anti-spyware software Check the computer system before entering confidential data Update the computer system regularly	2

Question 9 - 0417/May/June/24/12 Q12

(a)	Two from: Watching/spying on the user entering the password/data Watching/spying on the user to memorise the data/password People can eavesdrop/listen when personal data is being exchanged	2
(b)	Two from: Cover the key pad when entering the password When entering your password in a public place, sit with your back to the wall//Enter password when no one is nearby Unclick show password Use biometrics Use contactless cards	2

Question 10 - 0417/May/June/24/12 Q3

(a)	Two from: It is a security method Form of security to protect the resources/data that the user can access Adds another layer of security	2
(b)	Two from: Security token Biometrics GPS signal Receive/send a code you have to enter by email/SMS Username and Password Credit card number Phone number/email address Dongle/security app	2

Question 11 - 0417/May/June/24/13 Q3

(a)	Two from: It is a security method to protect the resources/data that the user can access It is an authentication method Ability to pass through security information from initial login to host PC It requires no manual input from the user	2
(b)	Three from: Voice recognition Fingerprint scanning Facial recognition Iris recognition Hand geometry recognition Typing recognition	3

Question 12 - 0417/Oct/Nov/23/13 Q8

(a)	Four from: Benefits • Cameras can be viewed from the smartphone so intruders can be seen/reported • Increased sense of security • You receive immediate alerts if there is a security breach Drawbacks • You may not be able to deal with the intruders if you are a long way away • The wireless technology/data could be accessed by hackers • If access to the internet is lost then control of the system is lost To gain full marks there needs to be both benefits and drawbacks	4
(b)	Two from: • Light • Temperature • Motion • Proximity/Passive Infra-red/PIR • Pressure pads • Acoustic/Sound	2
(c)	Four from: • An image is taken of the front of the vehicle • The image is sent to the software • The software isolates the number plate from the image • Colour brightness and contrast are changed this makes the plate easier to read • Each character is read/decoded using OCR software • The number plate is searched in the database • Comparison is made with number plates stored in the database • If the number plate is identified it allows the gate to open	4
(d)	Three from: • Another vehicle/pedestrian could obstruct the view of the camera • The number plate may be too dirty to read • The number plate may be in low light/poor weather conditions • The number plate may use illegal characters/font • The number plate could be in a different position than where it should be • Characters are misread • Position of characters/grouping of characters • The number plate has not been added to the system	3

Question 13 - 0417/Oct/Nov/23/11 Q7

(a)	Three from: • Password is not strong • It is easy to guess • The letters and numbers are in sequence on the keyboard • Easy to shoulder surf • It should be changed regularly to secure his login	3
(b)(i)	Encryption	1
(b)(ii)	Biometrics	1
(b)(iii)	Digital certificate	1
(b)(iv)	Firewall	1
(c)	One from: • If someone finds the password for one of the systems/accounts other systems/accounts are compromised • If someone finds the password for one of the systems/accounts then he has gained the company password	1

Question 14 - 0417/Oct/Nov/23/11 Q4

	Six from: <i>Similarity</i> • Both readers are in direct contact with the card • Both readers can cause wear and tear on the cards • Both are input devices <i>Difference</i> • Chip and PIN readers the user needs to know the PIN • The chip and PIN reader is susceptible to shoulder surfing • Chip and PIN reader prompts the user to enter a PIN • It is more secure as a PIN is needed • In the magnetic stripe reader the card can be used by anyone as no PIN is needed • The transaction is faster using a magnetic stripe reader • Less data entry errors using a magnetic stripe reader as no manual input To gain full marks the comparison must have both similarities and differences	6
--	---	----------

Question 15 - 0417/May/June/23/11 Q5

(a)	Electrocution	1
(b)	Fire	1
(c)	Tripping	1
(d)	Heavy equipment falling and <u>injuring people</u>	1

Question 16 - 0417/Oct/Nov/23/13 Q4

(a)	Six from: • User IDs and passwords combined protect against unauthorised access Combined user ID and password is unique to the computer system. • The user ID ensures the correct account is accessed, the password then protects the account • If someone knew the user ID they could only gain access with the correct password • Typing in incorrect user ID/password a number of times could lock the user out • User IDs give different access levels in the computer system • User IDs are unique and allow the system manager to monitor usage on the system • The password is masked and displayed as stars • A strong password is a combination of upper and lower case characters/numbers/symbols • Passwords could be biometrics ensuring greater security • Passwords increase security as they are only known by the user	6
(b)	Description Two from: • Uses parts of the body/physical attributes as a password • Unique to the user • Form of authentication Examples Two from, for example: • Fingerprint • Retina • Voice • Face	4

Question 17 - 0417/May/June/23/11 Q6

(a)	Six from: Benefits It is a strong password Hard to crack More secure Password is long therefore shoulder surfing is reduced Does not contain personal information so harder to crack Drawbacks Easy to forget as it has many different characters Even though it is still strong it is easy for a computer to crack The user would have to look at the keyboard when entering the password The user may have to write it down to remember it Letters and numbers could be confused... ...such as 1 and l, 2 and Z, 5 and S As it is long/complex it could be mis-typed To gain full marks candidates must have correct answers for both benefits and drawbacks	6
(b)	Two from: Retina scan Fingerprint/thumbprint Iris scan Facial recognition Voice recognition	2

Question 18 - 0417/May/June/23/13 Q5

(a)	Two from: Prolonged use of a keyboard Prolonged use of a mouse Using a keyboard with a bad posture Working in a cramped workspace	2
(b)	Two from: Staring at a computer screen for a long time Glare / flicker on the computer screen Dirt on the computer screen Screen brightness does not match the room light brightness Sitting too close to the screen Top of monitor not in line with the eyes	2

Question 19 - 0417/May/June/23/13 Q6

(a)	One mark for each form of identification and one mark for each corresponding example given: Form of identification: something the user owns: Example: card reader / pen drive / dongle / mobile phone Form of identification: something the user knows: Example: password / PIN / TAN / email address / CVV on back of a credit card / answers to security questions Form of identification: something the user has: Example: biometrics	4
(b)	Two from: To protect user's data / credentials To reduce the possibility of unauthorised access Combines two different forms of identification Makes it more secure by adding an extra layer of security	2

Question 20 - 0417/May/June/23/12 Q5

(a)	Repetitive strain injury/RSI/carpel syndrome	1
(b)	Eye strain/headache/neckache	1
(c)	Neck ache/back ache	1
